Co-Organizer: Geoff Hill

Novice School Organiser: Kristin Holmes (kristin@rallybc.com)

The Event

The Summer Novice Rally is intended as a practice Time-Speed-Distance Rally for newcomers to rally and does not count towards the BC Rally Championship. There will be a Novice School offered at no extra cost, but sign up is required to participate in the school. Novice School will provide a basic understanding of TSD rules, and navigator and driver roles and techniques. The school will cover all time-speed-distance calculations needed to be successful in BC TSD Novice or Calculator classes. The rally follows the current Rally Pacific Motorsports Association TSD Rally Regulations, which are posted on <http://rallybc.com>, and the C.A.R.S. General Competition Rules. The rally runs on straight-forward instructions. In addition to the route instructions, maps will be provided. The rally will be about 200 km long, entirely within the province of BC, and will start with an odometer check section of approximately 20 km. Roads will be 100% paved. Instructions are provided in both km and miles, but the official measurements and calculations are based on the km figures. The event will start and end in Mission, BC, at the Mission Springs Brewing Company Restaurant. Reservations have been made at the restaurant for the start of registration and lunch (1:00pm) and for the finish and dinner, ask the hostess for "Rally BC" when you arrive.

Schedule

Classes

For this Novice TSD Rally event, the following classes and definitions shall be used:

Practice: One or more team members have competed previously in TSD events. Unlimited equipment. Teams in this class will be scored, but not placed on the final results list, and will not be eligible to win the rally, trophies, or prizes. Competitors who have entered rallies previously and are just looking to practice are encouraged to enter this class.

Experienced: One or more team members have competed previously in TSD events. Accessory odometers, and non-programmable calculating devices that are not driven by a wheel.

Novice: Both team members having never competed in TSD events. Accessory odometers, and non-programmable calculating devices that are not driven by a wheel.

Paper: Any level of experience from both team members is accepted. Seat-of-Pants style: no calculators, rally tables or accessory odometers.

The organizer reserves the right to move teams to an appropriate class at any time up until the end of technical inspection. Teams will be notified if they are moved to a different class.

Required Equipment

1 self-supporting, reflective warning triangle (30cm per side), first aid kit (minimum contents defined by the BC rally regulations, available at <http://rallybc.com>), 5BC fire extinguisher. Open cars are permitted. Additional lights on the front should meet legal requirements as to type and mounting height; and must be wired to the high beam lights such that the additional lights turn off when switching to low beam. Fog lights may be wired independently.

Recommended Equipment

Calculator (battery powered, not solar), clipboard, pens and pencils, highlighter, stop watch or digital watch, notepad or paper for notes, flashlight or headlamp, driving lights, warm clothing, tow rope, snacks, water and caffeinated/energy beverages.

Event Details

Maximum distance between gas stops is 250km (150mi). Please note there is no gas stop between registration and the start of the rally, it is advised to fill up before arriving at registration. *There will be a sweep vehicle, but it will not be able to extract wayward cars from the BC scenery.* Drivers are asked always to drive with their headlights on and to be particularly courteous to traffic not connected with the rally. The rally will be divided into a number of legs, each leg ending with a meal stop or gas break. Each leg is divided into Transit stages and Regularity stages. Transit stages give a stage time that is adequate for completing the stage well within speed limits. Your time will not be recorded in these stages. Regularity stages list specific average speeds, which are below the posted speed limits, which you must maintain in each part of the stage. Your timing in these stages determines your score. Timing controls will be in regularity stages only, at various unannounced locations, and will not be placed near stop signs or busy intersections. Cars may not slow down excessively within sight of a timing control. At the control official's discretion the time may be recorded early when that happens. Procedure when approaching a control is simply to drive straight past without stopping. The control official will record your time. For double checking the results, you may wish to note the time and mileage at each control, but this is not required.

Your timing in these stages determines your score. Each control will have a penalty free zone one second each side of perfect time. A penalty of 1 point per second beyond this zone is assessed at each control. The lowest score wins. The maximum penalty at a control is 300 points (5 minutes) to a maximum of 600 points (10 minutes) in any one regularity section. Control officials will remain in place at least until all remaining cars are beyond 5 minutes late. Ties will be broken by the most zero scores, then the most 1 second penalties, etc.

Exceptions to Scoring

A competitor coming upon an accident is required to stop and render aid if necessary (e.g. in case of injury.) After rendering aid, the competitor should record the mileage in the section, and the time when they stopped as well as the time they restarted, and give a written declaration of this to a rally official or the event steward. Scoring adjustments will be made in such cases, and the crew should not try to regain the lost time until they reach a sufficiently long break (e.g. gas stop.) Declarations of time lost will also be considered for organizers' errors which make official time unattainable and other discretionary safety concerns. In the case where a competitor is stuck, but not injured or in any danger, they should wave rally traffic past and await the assistance of the sweep vehicle.

Other Notes

The rally will be passing through “quiet zones”. These zones require that *all accessory lighting is turned off, and all excess vehicle noise must be stopped* until you have cleared the “quiet zone”. These areas might include ranches or residential areas, and since the rally may be passing through during the night, we need to respect the surrounding areas.

Time intervals between vehicles will be either 1 *or* 2 minutes. This will be subject to discretion of the organizers on event day.
